

Burning Sensation at Lower Chest

Name : Dr. H.L. Nagaraj

Age : 54 years

Sex : Male

**Place : Srinivasa, Nilaya, Mysore Road,
Hiriyur, Karnataka**

I am a registered Homeopath practitioner, aged 54. I was having a burning sensation at my lower chest for almost 10 years. I felt pain after taking food and couldn't sit in the bus while traveling. I felt bowel obstruction at times. My wife and I happened to attend a session conducted by Empower India Movement and came to know about the health drink, **Indian Noni**. I started taking it for 2 months and found that it has a wonderful effect on my body. **The burning sensation at my lower chest had disappeared and I feel energetic and active. Indian Noni** is a very good health booster and immunity developer.
