

Depression and Joint Pain

Name : Mary Joseph

Age : 48 years

Sex : Female

Place : 6-7-6/201, RK Housing,

Chinnawaltair, Visakhapatnam, AP

I am 48-year-old widow who had recently lost my husband. I was very much depressed.

I neither could accept what was happening around me and nor could concentrate on my

work. Added to this situation, my joint pains made it very difficult for me to move

outside. I was introduced to this powerful liquid **Indian Noni** by Ms. Sujatha. On taking

Indian NONI **I feel my joint pain is gone away just like that.** I fought my way out

of depression and had learned to face the facts of life bravely. I am happy with my

family and would recommend this divine liquid, which is straight from the hands of God,

to all.

Joint Pain

Name : A.E. Kantharaja

Age : 36 years

Sex : Male

Place : Bangalore, Karnataka

I am a Human Resource Development executive and I am in my mid-forties. As I do all the company's work running around for everything, I had developed severe pain in my joints. Whenever I get the pain, I normally use some kind of pain relievers or balm for instant relief. I didn't care to look for a permanent solution for my joint pain. My friends and folks informed me that it is a hereditary problem which could not be solved and one has to live with it till one dies. It was true that my parents also had the same problem. I didn't know what to do; I was living with it for years. During a family orientation programme at Empower India Movement, I was introduced to this health drink called **Indian Noni**. I was desperate to know more about the product; I approached the coordinator for help. He explained about the product and asked me to start Noni. **After I consumed a bottle, my joint pains have totally disappeared.** Thanks **to Indian Noni !**
