I am a 48 year old business person and I own a petty shop in Hiriyur. I was suffering from headache, lumbar pain especially in the early mornings, and vomiting, cough & loss of appetite during the day. Added to this, any change of posture or any moment of sudden jerk brought in a certain kind of giddiness within me. Particularly after my afternoon rest, when I get up from my bed, I experience a sudden giddiness striking me. Thanks to Mr. Jagannath who introduced me to Empower India Movement. He gave me one bottle of Indian Noni for my good health. I started taking **Indian Noni** regularly as directed. Now, in the early mornings **no headache at all**, and **my lumbar pain is also reduced** considerably. I am also **relieved from my bodyache** and **there is no giddiness** when my posture changes. I feel hungry and eat food as a normal person without the uncomfortable feeling of vomiting. My gastric problem is reduced very much. For me **Indian Noni** is “Modern Sanjeevini”.
