

Head Injury

Name : H.H. Lakshminarayana Gowda

Age : 50 years

Sex : Male

Place : Kolar, Karnataka

I had met with an accident and had a head injury. I was hospitalised for a month and a half, and on being discharged from the hospital, I was advised to take rest for a minimum of 6 months. As I was 50-years-old and having Diabetes, my injury had not cured properly. I had lost a lot of weight too. I was advised not to ride a two-wheeler as I was not in a proper shape. One day, I was explaining my situation to my nephew. He had suggested to take **Indian Noni** and said that it will cure my Head Injury and Diabetes. I tried the liquid for a month. **To my surprise, I am totally recovered from the pain, I have put on weight and I am able to ride my two-wheeler again.** I almost regained my original strength. I will take **Indian Noni** for some more time. **Indian Noni** is a gift at the right time for me.
