

## Chronic Kidney Failure

**Name : J. Durgamba**

**Age : 40 years**

**Sex : Female**

**Place : Shapur Nagar,**

**Hyderabad, AP-500 855**

I been undergoing dialysis for the last four years. Due to the dialysis, I felt very weak and tired all the time. I could not carry out even the simplest household works. Also, I felt miserable about the amount of money that had been spent on my condition - all with no positive results. At this juncture, one of our associates Mr. Ratnanandam suggested me to consult Dr. Satish Kumar. I met the doctor and on his recommendation, I started drinking 30 ml of **Indian Noni** everyday, for two months. **Today, I am no more a dependent on dialysis and both my kidneys are functioning normally.** I feel active and am able to carry out my daily chores with ease. I strongly feel that **Indian Noni** is a necessity for one and all, healthy or sick !

## **Renal Failure and Angina**

**Name : Ashwin N. Chavan**

**Age : 43 years**

**Sex : Male**

**Place : 1142 A/3 E, Sykes Extn.**

**Kolhapur, Maharashtra - 416 001**

I am a physically large man, well built with rigorous physical exercise from the age of four. I was hit by severe stomach ache and down with total Renal Failure. During a medical examination, it was detected to be Angina associated with severe Cardiomyopathy. My blood pressure had reached to an exploding level of 240 – 170. The physicians were amazed and went for an immediate investigation. They found out that my heart had grown one and a half of its size. More physicians were called in. My life had almost come to an end. I was given just 2 hours for survival. Anything could happen to me, a cardiac failure or a brain haemorrhage. It was going to be fatal. Everything had almost come to an end. My only daughter 17 years of age and my nephew whom I loved most were with me. A feeling of utmost loss on their faces, trying to hold tears, gasping for words, they were there not knowing what to say. But everybody was dazed when I survived miraculously as a result of the physician's intellect and hard work. I was living with the biggest vital handicap of having a bloated heart and my kidneys had reached a state of failure. Fatigued with the thought of living a totally hopeless, crippled life, my mental state was worse than just being depressed. I was told I was medically beyond recovery and was supposed to live on a very special diet and not

to walk and talk. I was told that my future life span was very limited even with regular medication. I met this friend Abhijit Sawant, and on 28th of July 2003. I listened to him and I started the experiment with **Indian Noni. The result was fast, and beyond conception.** I was on the routine medical follow-up visit for every 15 days. At the end of August, I was told that **my heart had reached a stage of recovery.** My cardiogram was almost normal. I started exercising slowly. **My mental state has totally improved.** I started taking up some physical work, traveling on the bike, walking cross country, talking with people jovially and enthusiastically. Following routine treatment and examinations, my medications gradually came down, almost to nil status. My family has regained its confidence and the feeling of security which they had hopelessly lost in the earlier months. My daughter has started vigorously studying for her intermediates and we are back into Life. All because of the nature's miracle, **Indian Noni.** Mother nature has its own cure. Saying a word of thanks cannot relieve me from my obligation to **Indian Noni. Indian Noni** is my family member. It should be loved and consumed by all. Thanks to **Indian Noni.**

## Renal Failure

**Name : C. Ravindranath Singh**

**Age : 57 years**

**Sex : Male**

**Place : Hyderabad, AP**

My name is Chintaman Revindranath Singh. I am 57 years old. On January 2003, I was admitted in the Care Hospital, Hyderabad for breathlessness. Angiogram at Medicity Hospital detected a problem with my Aortic Heart Valve. I underwent Aortic Valve Replacement Surgery at Medicity Hospital. The same week, both my kidneys failed (Renal Failure) and I was on dialysis, 5 times a week. We spent lot of money on my treatment. My Nephrologists advised me to undergo Renal Transplantation, an expensive procedure but since I am a Diabetic & Hypertensive, he cautioned me not to be too optimistic. Feeling depressed and worried, I visited my family physician Dr. G. Satish Kumar, who advised me try **Indian Noni** which has worked well with similar cases like mine. With great hope, I started **Indian Noni** and surprisingly within 20 days, **my dialysis frequency started coming down gradually. Indian Noni** had improved my sense of well being and I have resumed my job. I am indebted to Dr. G. Satish Kumar for saving my life & introducing me to this wonderful juice I call, 'Amrutha' !
