

# Renal Stones

**Name : Irsahad Mussa Khatik**

**(Presented by his Father)**

**Age : 12 years**

**Sex : Male**

**Place : 48 / E, Sadar Bazaar, Kolhapur**

My son Irsahad was generally a healthy person till 2002. But for the past two years he was suffering from some kind of stomachache and he used to take very little food. He became very weak and his body weight was slowly decreasing. Saddened by this reality, I met my family doctor for support. The doctor had examined my son and asked me to approach a specialist with a scan report. I took the scan reports and approached the specialist who gave me the news that jolted me totally. He said that there is a stone formation in the kidneys and an operation is essential within a month. He had also told me that the expenses will be around Rs.12,000/-. I approached another charity hospital and explored the possibility of reducing the cost of the operation. Having understood my condition sympathetically, they said that it could not be reduced less than Rs. 7000/-. I was totally lost at that hopelessness. Incidentally I happened to meet Mr. Ashwinkumar Chavan, who told me about the miracles of a great juice called **Indian Noni**. He told me the benefits of **Indian Noni**. He advised me to give **Indian Noni** to my son and he educated us how to take **Indian Noni** regularly. Irsahad started taking **Indian Noni**. After a week, he felt very good.

The **stomach pains were reduced and miraculously he found that renal stones were passing through urine without any trouble**. He collected the urine in a pot and we all observed that there were stones of different sizes. I have sent these stones to you for your archive. We owe a lot to **Indian Noni**. My family is very much pleased. My son is perfectly alright now and we are very much pleased. We are grateful to **Indian Noni**.
