

## Severe Anaemia

**Name : Karuna**

**Sex : Female**

**Place : Secunderabad, AP**

My problem of breathlessness made me go to my doctor, who on investigations found out that I was anaemic. My Hb was 6 gms% only. He suggested me to take **Indian Noni** for 6 months. My blood test was repeated after 1 month of regular intake of Indian Noni and the result was amazing. My Hb was up to 10.2 gms %. **I started feeling much better and was able to do all my household work as before.** I am happy with **Indian Noni** and I want to continue it throughout my life.
