Pune-411027

I am a Computer Engineering Student. I used to get sick very frequently.

Due to this I had a huge back log studies. I was anaemic. My body resistance was also poor. Regularly I used to fall sick and get admitted in the hospital at least 3 times in a year and my studies became irregular.

I could not complete my exam portions. My haemoglobin was 7.5 and this gave me lack of concentration.

My mother was using Indian Noni. So I too started using Indian Noni. Within a month's time the haemoglobin reached 10.8. My energy level also increased. In this two months not even once I fell sick.

Indian Noni is an family doctor.
