Andhra Pradesh

I was suffering from frequent bleeding from nose. The black patches on my thighs were causing irritation and itching.

I contacted an ENT specialist and other skin specialist doctors. They told me that this is because of the shortage of white corpuscles.

They injected white corpuscles in my body three times but they were of no use to me.

Mr. Syed Hegari, the distributor of Indian Noni at Cumbum contacted my family members and advised me to drink Indian Noni.

I started Indian Noni from 02.03.2004. Continuously till now. I have no compliance of above problem and I am healthier.

Indian Noni works better in me. It is really great.
