I served in State Bank of India as an Officer and has availed Voluntary Retirement 15 months back. Due to stress and hard work I became victim for Diabetes during 1990. Since then I was dependant on medicines. Even then the sugar level used to vary on many occasions. I was also feeling tired and weak. Many times I was undergoing Hypoglycemia. (lower sugar level).

I was also suffering from chronic pharyngitis because of that I used to suffer from severe throat infection coupled with cold and cough. At that condition I was forced to take antibiotics and other medicines which were leading to further weakness. I also developed knee pain in the recent past. In a nutshell I was totally upset with my health condition.

I was introduced to Indian Noni during January 2005 by Noni Consultant Shri I.S.Dyawangoudar. I started taking Noni from February 2005 as directed by him. To my surprise, I could notice the positive results within a month. Now I have completed five bottles of Noni.

Now my sugar level is very much under control. I feel much energetic and zeal in my work. I can walk 4-5 km. without tiredness. My throat infection problem is completely disappeared. I feel much healthier and has developed increased immune power. I can sustain cold and dust allergic conditions. My knee pain is also gone and I am able to step up the staircase without any difficulty.

Thanks to the Divine fruit Noni which helped me to overcome my health problems and made to live a meaningful life.
