I was suffering from genetic disorder by birth, namely retinitis pigmentosa (acute), a chronic eye problem.

My eye sight was -10+ with cylindrical vision. Field vision was just 10%. Optic nerve very weak. I lost 90% of my eye sight as of now.

Mr.V.S.Varaprasada Rao introduced me to Indian Noni. After taking Indian Noni my reading point has slightly changed. But I am free from another problem of some lump in my stomach, which used to give me constant pain, burning sensation and breathlessness. This problem aggravated when I took spicy food.

Now I don't feel any pain or burning sensation in my stomach, even if I eat lots of spicy food. Thanks to Indian Noni. I strongly believe that

I will at least remain with whatever vision left without further deterioration, if not cured altogether.
