Female

D4 / 4144, Vasant Kunj
New Delhi-110070

On June 27, 2004 I had fallen and was operated upon with a rod and a plate on my right leg upper portion.

I was bedridden for nearly 1½ years and my sugar level shot up to 600.

Since I started taking Noni regularly, I survived without any pain and even succeeded the ill effect of diabetes.

I am able to do all the normal chores myself without any body's support.

I still continue taking Noni which is an excellent health enhancer.

Thank you Noni.
