

Low Appetite

Saradibai V. Lullani

76 Years

Female

Koyana Colony

Near Water Tank

Gandhinagar, Kolhapur

Maharashtra-416011

I am 76 years old. I went through eye surgery and knee surgery and because of the strong medicines my appetite became low. For me it was difficult to walk.

When my grandson Sanjay Gangwani noticed my diet ($\frac{1}{4}$ chappati and some milk) immediately he suggested me Indian Noni. Within 2 months I started taking 2 chappaties, rice and milk. My appetite improved. After 3 months I can walk easily.

Because of Indian Noni I feel cheerful, happy and healthy.

I am grateful and thankful to Indian Noni.
